

## Shoulder Pain and Disability Index

Please place a mark on the line that best represents your experience during the last week attributable to your problem.

### Pain scale

How severe is your pain?

Circle the number that best describes your pain where: **0** = no pain and **10** = the worst pain imaginable

At its worst?	0	1	2	3	4	5	6	7	8
When lying on the involved side?	0	1	2	3	4	5	6	7	8
Reaching for something on a high shelf?	0	1	2	3	4	5	6	7	8
Touching the back of your neck?	0	1	2	3	4	5	6	7	8
Pushing with the involved arm?	0	1	2	3	4	5	6	7	8

Total pain score \_\_\_\_\_ / 50 x 100 = \_\_\_\_\_ %

(Note: If a person does not answer all questions divide by the total possible score, eg. if 1 question missed)

### Disability scale

How much difficulty do you have?

Circle the number that best describes your experience where: **0** = no difficulty and **10** = so difficult it requires help

Washing your hair?	0	1	2	3	4	5	6	7	8
Washing your back?	0	1	2	3	4	5	6	7	8
Putting on an undershirt or jumper?	0	1	2	3	4	5	6	7	8
Putting on a shirt that buttons down the front?	0	1	2	3	4	5	6	7	8
Putting on your pants?	0	1	2	3	4	5	6	7	8
Placing an object on a high shelf?	0	1	2	3	4	5	6	7	8
Carrying a heavy object of 10 pounds (4.5 kilograms)	0	1	2	3	4	5	6	7	8
Removing something from your back pocket?	0	1	2	3	4	5	6	7	8

Total disability score: \_\_\_\_\_ / 80 x 100 = \_\_\_\_\_ %

(Note: If a person does not answer all questions divide by the total possible score, eg. if 1 question missed)

Total Spadi score: \_\_\_\_\_ / 130 x 100 = \_\_\_\_\_ %

(Note: If a person does not answer all questions divide by the total possible score, eg if 1 question missed)

Minimum Detectable Change (90% confidence) = 13 points

(Change less than this may be attributable to measurement error)
